EDUCATION

Indian Institute of Information Technology Dharwad

Bachelor of Technology in Data Science and Artificial Intelligence

CGPA: 8.3

June 2022 – May 2026

EXPERIENCE

Software Developer Intern

ENTNT

Dec 2025 – Present

Remote, IN

- Engineered AI-powered web applications for global enterprise clients using React.js, Next.js, and Node.js, owning delivery end-to-end across requirements, implementation, and production deployment.
- Integrated LLM APIs into client-facing products, automating key workflows and reducing manual processing overhead by ~40% across 3+ global projects.
- Maintained production reliability and code quality across a fully async, distributed team — shipping features with zero-downtime deployments in a remote-first engineering environment.

Software Developer Intern

Dentsu

Jun 2025 – Jul 2025

Bangalore, IN

- Reduced job failures and SLA breaches by 35% by enhancing RCA observability pipelines, handling spikes of up to 1,611 failures/day across 2,000+ daily crawl jobs.
- Engineered NLQ-to-SQL AI chatbots using GPT-4o and Snowflake Cortex, enabling natural language querying over 1–2B daily data points for 100+ retail clients.
- Built a full-stack monitoring dashboard (React.js, Express.js, FastAPI, Snowflake) providing real-time job visibility and cutting mean-time-to-detection for pipeline incidents.

Software Developer Intern

DataAstraa

Aug 2024 – Sep 2024

Remote, IN

- Refactored 1,000+ lines of legacy JavaScript into a modular TypeScript architecture, eliminating 70% of runtime errors and significantly improving long-term maintainability.
- Optimized Node.js/MongoDB backend with server-side pagination and indexed queries, slashing API latency 4.5× from 1.8s to 400ms.
- Built a reusable React hook library for complex form state management, cutting boilerplate by 60% across 15+ UI components and accelerating feature delivery.

PROJECTS

• [Mail.ai](#)

Next.js, Prisma, PostgreSQL, Stripe, BullMQ, Redis, Groq SDK

- Engineered an AI-powered bulk email platform with Groq-SDK-generated personalized templates, a Redis + BullMQ delivery pipeline achieving 40% faster throughput and 99.9% uptime.
- Implemented Stripe usage-based billing and automated invoicing, enabling tiered subscription monetization for enterprise clients with full payment lifecycle management.

• [Cal.ai](#)

Next.js, PostgreSQL, Prisma, Gemini, Claude, Razorpay, Redis

- Architected an AI fitness and nutrition platform with image-based meal analysis using dual-model orchestration (Claude + Gemini fallback), serving ~100 requests/day at 45–55% lower inference cost.
- Designed a time-series health data layer with PostgreSQL + Prisma supporting 25+ active users with near-100% cache reuse; owned end-to-end monetization via Razorpay generating ~Rs.2.5K/month MRR with Redis-based rate limiting for platform abuse prevention.

TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, Python, C++, C, SQL
- Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, FastAPI, Hono, Prisma, NextAuth
- AI / ML:** OpenAI GPT-4o, Claude API, Gemini API, Groq SDK, Snowflake Cortex, LLM API Integration
- Databases & Infra:** PostgreSQL, MongoDB, Redis, BullMQ, Snowflake
- Web Technologies:** HTML, CSS, Tailwind CSS
